The diagram illustrates a full-duplex bus system. On the left, two stations are shown: K1 and K2. Each station has a vertical line connecting it to a horizontal bus line. The bus line is labeled 'BYE' at both ends. A label 'K3' is placed near the bus line, indicating a specific point or component. The bus line extends to the right, where it connects to another part of the system.

```

graph LR
    M1[BYE  
BYE] --- M5
    M2[BYE  
BYE] --- M5
    M3[BYE  
BYE] --- M6
    M4[BYE  
BYE] --- M6
    M5 --- M7
    M6 --- M7
    M7 --- Out[ ]
  
```

The diagram illustrates a hierarchical merging process. It starts with five pairs of 'BYE' messages at the bottom. Each pair is connected to an internal node labeled M1 through M5. The nodes M1 and M2 are connected to M5, while M3 and M4 are connected to M6. Finally, M5 and M6 are connected to a single output line labeled M7. The 'BYE' messages are arranged in a staggered, tree-like structure, with each level of branching represented by a horizontal line segment.
